SUMMARY

Experienced self-taught **Senior Software Developer** with a strong background in full-stack development, 3D visualization, and DevOps. Proven track record building scalable applications for startups and enterprise platforms, including digital twin solutions at Aize AS and e-commerce rental systems at Fjong Norge. Adept at leading teams, mentoring developers, and driving cross-functional collaboration. Skilled in modern web technologies such as **Angular, React, Node.js, Three.js**, and cloud-native tools including **Docker, Kubernetes**, and **CI/CD pipelines**. Known for combining technical depth with creativity, and for thriving in fast-paced, innovative environments.

EXPERIENCE

Senior Software Engineer

Aize AS

August 2021 – June 2024, Oslo

- Developed a high-performance **3D digital twin viewer** using Angular, Three.js, and WebGL to visualize large-scale industrial assets (e.g., offshore platforms).
- Built a custom **engineering document viewer** with annotation tools, metadata linking, and real-time collaboration features.
- Contributed to Aize's **core platform**, integrating micro-frontends from multiple teams into a unified application with shared modules and state management.
- Designed and maintained **CI/CD pipelines** in Azure DevOps for rapid, safe deployment of production features and bug fixes.
- Participated in **technical hiring**, conducting interviews and evaluating candidates for engineering roles.
- **Mentored junior developers**, led knowledge-sharing sessions, and supported onboarding of new team members.
- Led cross-team **feature discovery and prototyping initiatives**, focusing on user needs and scalability.
- Optimized rendering performance and asset loading in the 3D viewer for smoother real-time interaction.
- Collaborated with UX designers, product managers, and backend teams in an Agile (Scrum) environment.

Full-stack developer

Fjong Norge AS

June 2018 – August 2021, Oslo,

- **Led a team of 3 developers**, coordinating feature development, code reviews, sprint planning, and knowledge-sharing to enhance productivity and delivery quality.
- **Full-stack development** across both front-end and back-end systems, utilizing technologies such as React, Node.js, PostgreSQL to support subscription services, one-time rentals, and inventory management.
- **Server & database administration**, overseeing the deployment, scaling, monitoring, and maintenance of servers (e.g., AWS/Linux) and databases, ensuring secure, performant, and highly available services.
- **Platform enhancements**: implemented user-centered features such as dynamic outfit recommendations (digital styling), flexible swap/subscription functionality, and seamless rental workflows (shipping, returns, cleaning tracking).
- **Performance & stability**: optimized API endpoints, improved query performance, and administered CI/CD pipelines to reduce bugs and deployment turnaround.

Instructor

Bitcamp

January 2018, Oslo

- Designed and delivered engaging programming curricula for students aged **7 to 16** at Oslo International School.
- Developed **interactive lessons and hands-on projects** to teach core computational thinking and coding concepts.
- Adapted content to suit various age groups and skill levels, fostering creativity and technical confidence.
- Promoted STEM learning through **gamified exercises**, real-world problem solving, and student-led innovation.
- Supported Bitcamp's mission to make programming education accessible and exciting for young learners.

Frontliner

Greenpeace Norway

January 2017 – September 2017, Oslo

- Served as a **frontline representative**, traveling to cities across Norway to engage the public on environmental issues and Greenpeace campaigns.
- Recruited new members and increased awareness about climate action, ocean protection, and sustainable energy initiatives.
- Developed strong communication and persuasion skills through daily public interaction.
- This role marked my **first job after relocating to Norway**, helping me connect with Norwegian culture while building valuable interpersonal and language skills.

Web and Mobile Application Developer

Irie FM and ZipFM (Groove Broadcasting Co.)

October 2008 – November 2011, Jamaica

- Designed and maintained the station's website and digital branding as part of the in-house creative team.

- Configured and administered **Linux-based web servers** to host the company's online presence and digital content.
- Set up and maintained a **Shoutcast streaming server**, enabling live internet radio broadcasting.
- Ensured server uptime, performance, and security through regular maintenance and troubleshooting.
- Played a key role in bridging creative and technical functions, supporting both design and IT operations.

EDUCATION

React 16 - The Complete Guide

Udemy • 2018

- ReactJS, Redux, React Routing, Animations.

Certified Forklift Operator

Kompetansebedriften • Norway • 2017

Creative, Serious and Playful Science of Android Apps

University of Illinois at Urbana-Champaign • 2014

Certificate in Web Page Design & Development

Vector Technology Institute • Jamaica • 2013

Secondary School

St. George's College • Jamaica • 2000-2005

SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, Node.js, Angular, React, React Native, Express.js, HTML5, CSS3, SCSS
 - **3D & Visualization:** Three.js, WebGL
 - **DevOps & Infrastructure:** Azure DevOps, Docker, Kubernetes, CI/CD pipelines, Helm, Linux server administration
 - **Databases:** PostgreSQL, MySQL, MongoDB
 - **Architecture:** Micro-frontends, modular monoliths, REST APIs, GraphQL, event-driven systems
 - **Tools & Practices:** Git, Agile/Scrum, TDD, pair programming, code reviews, technical documentation
-
